DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 12/26/2006 has been entered.

Allowable Subject Matter

2. Claims 1,4-26,35 are allowed.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claims 29,36 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 29 recites "a print head with an ink jet nozzle mounted thereon". What has the print head? Since a new indentation hasn't been made for this element, does the compulsory power switching unit have the print head? Or the power switching apparatus? Secondly, does this recitation mean the ink jet nozzle is mounted on the

Art Unit: 3651

print head, or is the print head with an ink jet nozzle is mounted on something else?

What is meant by this new limitation?

Claim 36 recites "a paper-feed position and a scanner-driving position" in lines 7-8 of the claim. Elements related to a paper-feeder or a scanner have not been claimed. What are these positions? How are they related to a paper-feeder or a scanner? With the exception to these "positions", the claim is unrelated to printers and/or scanners.

Claim Rejections - 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

6. Claim 29, as best understood by the examiner (see ¶14), is rejected under 35 U.S.C. 102(b) as being anticipated by Sugiyama USP 5,206,737.

Sugiyama discloses a power switching apparatus (fig.6-11) comprising:

- A main clutch gear (96) movably disposed at a rotation axis and coupled to the driving source
- First and second clutch gears (126,154) rotatably disposed at the rotation axis
- A clutch spring (C8/L25-39)
- A compulsory power switching unit (90)
- A print head with an ink jet nozzle (40)

Conclusion
